

人と地球にやさしい

かみ

ぞうり

KAMI ZŌRI

水に強い新開発の紙紐で、わら草履の利点を生かし、欠点をカバーする紙草履を作りました。

《特徴》

- ① ワラと違ってクズが出ませんので室内履としても使えます。
- ② 足の裏の汗を速吸・速乾しますので、足の裏を清潔の保ち、いつもサラサラの履きごちで、水虫にも有効です。 (人にやさしい履物です。)
- ③ ワラと違って100%繊維分ですので軽く、強靱で長持ちします。
- ④ 耐水加工していますので、ネットに入れて洗濯機で洗えます。
- ⑤ 履き潰した後は燃やしても有害ガスは出ませんし、土に埋めれば肥料になります。 (地球にやさしい履物です。)

A Treat For Your Feet: The Advantages of Paper Zori

Zori, Japan's traditional straw sandal, provides the wearer with many benefits. Zori help to develop the arch of the foot while it's rough, woven surface stimulates circulation in the sole. The thong of the zori anchors the sandal to the foot, making easier and freeing the toes. Further, zori allow greater exposure of the foot to air, thereby providing an environment that discourages skin disease.

Although traditional zori are made of straw, the development of a new, durable cord made from paper fiber has led to the creation of machine-washable paper zori that last six times longer,

and are warmer and more comfortable. Paper zori also absorb sweat more thoroughly, and dispense it over a vast surface, enabling fast evaporation.

Paper zori are also the perfect indoor footwear. The old zori broke down and scattered straw, whereas the new style make no mess. They are perfect after taking a bath or in the kitchen.

Better yet, when paper zori finally wear out, they are biodegradable just like fallen leaves, thus returning to Mother Nature a renewable resource.

Something This good is surely worth stepping into.
